Parfait Website – Possible Features

Let's imagine what's realistic for a small business website:

1. **Homepage (Landing Page)**
2. **Menu / Products Page**
3. **About Us Page**
4. **Order Page**
 - Simple order form: name, phone/email, parfait choice, quantity
 - Option to upload proof of payment (if they want that)
 - **Cart System** → customers can add parfaits (sizes, qty).
 - **Checkout** → customer details + delivery address.
5. **Payments (Options):**
 - Online payment (trusted provider like **Paystack, Flutterwave, Stripe, or PayPal** depending on location).
 -
6. **Contact Page**
 -

Admin Side (for the Client)

1. Project Overview

The goal is to design and develop a **modern, mobile-friendly website** for [Brand Name] that showcases parfait offerings, allows customers to place orders online, and builds brand trust. The website will balance **visual appeal** with **ease of use** to attract and retain customers.

2. Key Features

a) Core Pages

- **Home Page** → Hero banner with high-quality parfait imagery, tagline, and a “Shop Now” button.
 - Eye-catching image of parfaits
 - Business name & slogan (e.g., “*Layers of Happiness in Every Cup*”)
 - Call-to-action: “View Menu” or “Order Now”

- **Menu / Products Page** → Display of available parfait flavors with images, prices, and descriptions.
 - List of available parfait flavors
 - Pictures, prices, and descriptions (ingredients, size)
 - (Optional) Filter by flavor type (fruity, chocolatey, healthy, etc.)
 - List of available parfait flavors
 - Pictures, prices, and descriptions (ingredients, size)
 - (Optional) Filter by flavor type (fruity, chocolatey, healthy, etc.)
- **About Us Page** → Story behind the brand, mission, and values.
 - Business story (origin, passion, uniqueness)
 - Maybe a “Meet the Maker” photo
- **Contact Page** → Contact form, WhatsApp link, SnapChat link, and business details.
 - Or a simple “Contact Us” form that sends email

b) Ordering System

- **Cart Functionality** → Add multiple items, update quantity, view total.
- **Checkout Page** → Collect customer details (name, phone, address).
- **Payment Options** →
 - Cash on delivery (simplest).
 - Bank transfer with upload proof.
 - *Phase 1*: Pay on delivery / bank transfer.
 - *Phase 2*: Secure online payments (Paystack/Flutterwave/Stripe).

Simple order form: name, phone/email, parfait choice, quantity

- Option to upload proof of payment (if they want that)
- **Cart System** → customers can add parfaits (sizes, qty).
- **Checkout** → customer details + delivery address.

c) User Accounts (Optional, Phase 2)

- **Guest Checkout** (no login needed for quick purchases).
- **Account System** (returning customers can log in via Google/Facebook/Apple).

d) Admin Panel (Optional Upgrade)

- Dashboard to view/manage orders.
 - Mark orders as “Pending,” “Preparing,” or “Delivered.”
 - Export order data (for bookkeeping).
 - View orders (name, items, delivery info).
 - Mark orders as “Confirmed,” “Preparing,” “Delivered.”
 - Export list (optional, for bookkeeping).
-
- **Gallery / Testimonials (Optional)**
 - Customer reviews with pictures of their parfait cups
 -
 - **Footer (Every Page)**
 - Business contact info (phone, WhatsApp, Instagram link)
 - Operating hours

e) Target Users

- **Primary:** Local customers who want to order parfaits (mostly mobile users).
- **Secondary:** New visitors discovering the brand online (Instagram/Google).

Benefits for [Brand Name]

- ✓ Professional online presence that builds customer trust.
- ✓ Mobile-first design (most food orders happen on phones).
- ✓ Easy ordering process that boosts sales.
- ✓ Flexible setup — start with simple online orders, scale later with payments & accounts.
- ✓ Secure and future-proof tech stack.

Nice-to-Have (Future Phase)

- Online payments (Paystack/Flutterwave/Stripe).
- User login with Google/Facebook.
- Admin dashboard with analytics.
- Loyalty program (discounts, points).
- Content: Client provides images, logo, brand colors.

? Questions to Ask Her

Business Goals

1. What's the main purpose of the site? Showcase? Drive sales? Build brand trust?
2. How do customers currently order (Instagram DMs, WhatsApp, walk-ins)?
3. Do you want payments online immediately, or start with "order online, pay on delivery"?

Content & Branding

4. Do you have a **logo, brand colors, or fonts** you want me to use?
5. Do you have **product photos** ready, or should we use placeholders until then?
6. Any **tagline, story, or "about us" text** you want highlighted?

Features & Flow

7. Should customers **create accounts**, or just checkout as guests?
8. Do you prefer **orders to go to your email/WhatsApp**, or into a system/dashboard?
9. Do you want to offer **delivery, pickup, or both**?

Operations

10. How do you track orders now? (This helps decide if she needs an admin panel.)
11. How many orders do you expect daily/weekly? (Helps with scaling decisions.)
12. Do you want to collect **customer data** (emails/phone numbers) for future promos?

Long Term Vision

13. Would you like the site to connect with **Instagram or TikTok feeds**?
14. In 6 months, would you prefer adding **loyalty points, discounts, or gift cards**?
